Front Brake Pads 2009 Ford

The brake pads on your Ford F-Series use a metal backing plate with friction material on the front that presses against the rotor to stop your truck. Brake pads are compressed by the brake caliper when it receives hydraulic pressure from the brake master cylinder. With time, brake pads naturally wear down, but it can help to pay attention to their wear patterns.

The best is the ceramic brake pad. Ceramic pads are composed of a dense ceramic material with embedded copper fibers. The inboard brake shows more wear than the outboard pad. This happens when the caliper piston is not returning to the rest position due to a worn seal, damage, or corrosion. Find OEM brake pad replacements here at Ford Parts ...
