Hex Head Bolts DIN 931 (ISO 4014) The most common type of fastener, a hex head bolt is designed to be tightened with a standard spanner or ratchet and socket. Popularly used in all assemblies, a standard hex bolt is a staple across the world. Manufactured to ISO 4014 or DIN 931, and therefore includes an unthreaded section of the shaft.

Hex Bolts - Westfield Fasteners Ltd

Tight-Spot Hex Head Screws A high-strength alternative to blind rivets, these Class 8.8 steel screws can be used when only one side of the material is accessible. When the screw is tightened, the attached nut expands the sleeve to create a strong clamping force on the back of the material.
