### Shingle Applicator's Manual - Apps on Google Play

Measure one panel width in from the roof edge. At this point chalk a line from ridge to eave. Place the leading edge of the first panel along this line. It is extremely important that this panel be laid square to the eave and ridge so that the remaining panels will line up square on the roof frame.

### INSTALLATION MANUAL - DIY Metal Roofing Materials

Use chalk lines to make a guide for yourself. Depending on the type of shingles you're using and the roof you're working on, you may need to marking a chalk guideline beginning 7 inches (17.8cm) from the bottom roof edge. In either case the glue strip of the starter course is then placed along the drip edge, and at the rake edges as well.

### How to Install Asphalt Shingles: 15 Steps (with Pictures)
