

= 0 is not a possibility, since this would imply  $\sin \mu = 0$  and the two equations have no common solutions.

**Differential Equations Paul Blanchard Solutions Manual**

7. The general solution of the differential equation  $dr/dt = -\lambda r$  is  $r(t) = r_0 e^{-\lambda t}$  where  $r(0) = r_0$  is the initial amount. (a) We have  $r(t) = r_0 e^{-\lambda t}$  and  $r(5230) = r_0 / 2$ .

**Differential Equations 4th Edition Blanchard Solutions Manual**

Differential Equations is a very difficult subject to grasp fully and without the solution manual it is very hard to see how you get the answers. This book fills in the gap. One thing to take note is that the book only shows odd question answers and only answers to medium or hard questions, self explanatory questions are ignored.
